

# CONSTRUCTION

HARTFORD JT 1

AUGUST 14, 2025

## CENTRAL

The excavating crew is burying the pipe that takes storm water away from our roof and into the Wildcat Preserve. The front entrance to the school should be much dryer than before!!

## LINCOLN

The new cooler and freezer are being installed in the Lincoln kitchen. The boxes are up, concrete was poured inside for the floors, they will be covered with epoxy and when that is cured, we can set up racks, turn them on and start storing food!

## ROSSMAN

In the bathrooms, the stall partitions have been taken out and new partitions made of composite material will be installed next week.

*Watch our progress throughout the summer!*

THANK YOU, VOTERS!
