

# CONSTRUCTION

HARTFORD JT 1

AUGUST 21, 2025

## CENTRAL

The construction crew is working really hard to get the school ready. Some of the Central office design elements are coming along. The yellow accent wall and the wood wall look incredible and it won't be long until Kim and Debra move in.

## LINCOLN

This is one of the two Special Ed rooms created from one classroom. The flooring and casework are in, the above ceiling inspection was completed today and now the ceiling tiles can be installed. There's a lot of work to be completed at Lincoln, but the contractors have been working overtime and weekends to get us ready to go!!

## ROSSMAN

The concrete around the main entrance was poured today, and backfilling will be next. This is another project that is really close to completion and will look very nice when it's finished.

*Watch our progress throughout the summer!*

THANK YOU, VOTERS!
