HARTFORD JT 1

AUGUST 7, 2025

CENTRAL

At right, is an image of our new security doors which will help to limit access to our academic wings. You can see that some classroom doors had to be relocated in order to become part of the secured area.

LINCOLN

For the big reveal... or at least, you get to see the start of our new staff bathrooms! Behind the stage, the new staff bathrooms have been roughed-in. Next to the shovel is where a drinking fountain will be. What isn't pictured is all of the other work that has been occurring behind the stage where music and art were previously housed, along with the staff lounge and workroom.

ROSSMAN

The new canopy is up and the welding on the roof deck has been done. The place for a light fixture has also been set. This canopy, while shorter than its predecessor, is significantly wider and adds a lot of coverage! Sealing will occur next week.

Watch our progress throughout the summer!

THANK YOU, VOTERS!
