

CONSTRUCTION

HARTFORD JT 1

JULY 31, 2025

CENTRAL

The demo in the front office is complete. Reconstruction will now take place quickly. The new door frames from the vestibule into the office have been delayed a bit, but Miron and the subs will keep working on the rest!

LINCOLN

This is a good picture that shows the trench along the ground level that was necessary to add the concrete foundation ledge for the brick and the old brick and window removal. This work will continue around the eastern half of the building into the fall, and the Rural St. side is the priority before school starts.

ROSSMAN

The steel for the new canopy is going up and there is a lot of welding for the roof deck up next. This will look really great when it's completed!

Watch our progress throughout the summer!

THANK YOU, VOTERS!
